

Sub-Acute Isolation Gown Program

Reusable Isolation Gowns offer enhanced protection for healthcare providers and patients. They can be worn multiple times as long as they are processed after single use. **Mission's program for reusable isolation gowns includes a tracking label to record washes and wears.**

Below is an overview of the laundering process.

When you work with Mission you have a trusted partner who cares about the safety of your hospital. We follow strict processing standards, build a reusable gown service program, and help you realize cost savings.

Mission Partners with Ecolab®

THE CDC STATES THAT EACH YEAR **1.7 MILLION HAIs**
OCCUR IN U.S. HOSPITALS

We use Ecolab's AdvaCare™
Disinfectant, proven to kill *C. difficile*
on linen and in wash waster

Per the Centers for Disease Control and Prevention (CDC), of all the surfaces in a hospital, a patient will have the greatest degree of contact with his gown and the bed linens. Making sure these linens are disinfected in the wash process, to ensure the linens are free of potentially harmful microorganisms, is critical.

Patient Safety Starts in the Laundry

If your facility takes all measures necessary to prevent or limit the spread of HAIs, Mission and Ecolab are here for you as an extension of your operation. CDC guidance is to process healthcare linens at 160°F for 25 minutes, which can be difficult to achieve. AdvaCare™ Disinfectant is an antimicrobial chemical intervention, allowing lower temperature and shorter contact times.

The AdvaCare™ Disinfectant Difference

AdvaCare™ Disinfectant is an EPA-registered laundry disinfectant oxidizer with **kill claims against eleven microorganisms¹ of concern on healthcare linen**, including *C. difficile*; the number one U.S. **healthcare-associated infectious microorganism**. AdvaCare Disinfectant outperforms chlorine and peroxide for disinfecting, whiteness, extending linen life, sustainability and overall effectiveness.

¹ AdvaCare™ Disinfectant is an EPA-registered laundry disinfectant which is utilized in the wash process as an antimicrobial intervention and allows you to disinfect healthcare linens at temperatures as low as 140°F for 5 min. AdvaCare™ Disinfectant has kill claims for Staphylococcus aureus, Klebsiella pneumoniae, Pseudomonas aeruginosa, Acinetobacter baumannii, Escherichia coli 0157:H7, Listeria monocytogenes, Methicillin – Resistant Staphylococcus aureus (MRSA), Community-associated Methicillin-Resistant Staphylococcus aureus (CA-MRSA), Salmonella enterica, HIV-1 (AIDS) Virus, Carbapenem - resistant Klebsiella pneumoniae (KPC), Enterococcus faecalis – VRE, Clostridium difficile. Follow EPA label guidance for time, temperature and concentration requirements. The Clostridium difficile claim is currently being reviewed by the state agencies including the California Department of Pesticide Registration (CDPR).
